# Transitional Essentials

---

## collection

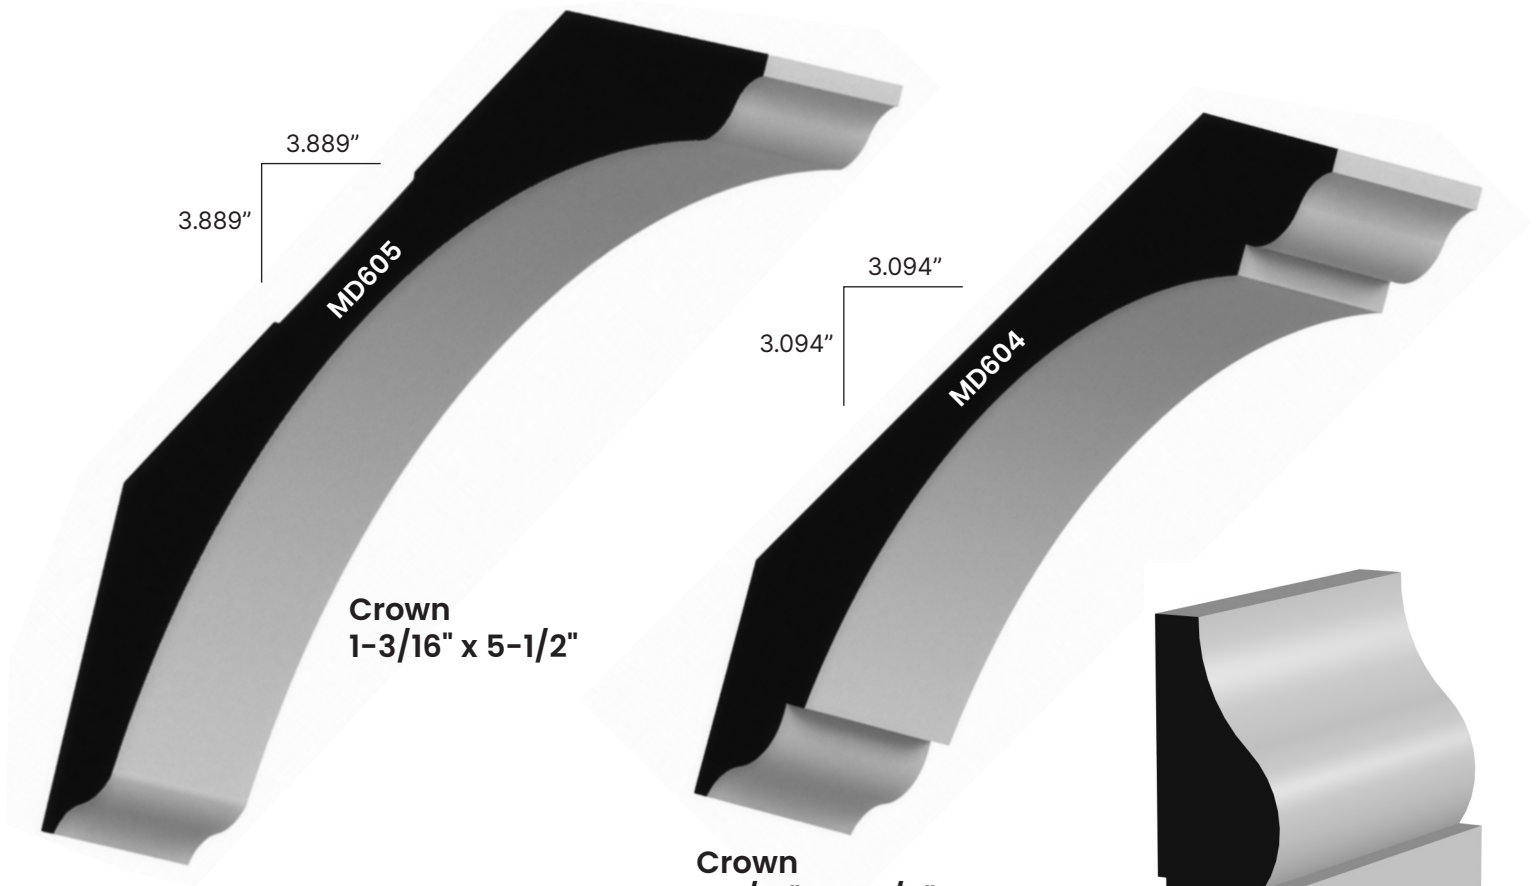

Introducing the Transitional Essentials Collection, a thoughtfully curated lineup designed to deliver elevated style, broad design compatibility, and exceptional value. At the heart of this launch are our two new crown mouldings—MD604 (4-3/8") and MD605 (5-1/2")—crafted with clean, transitional lines that strike the perfect balance between classic refinement and modern simplicity. These new crowns bring fresh dimension and architectural presence to any space.

This collection is also distinguished by the reintroduction of our AB108 casing, brought back from the MDO archives for its timeless silhouette.

Designed to complement a wide range of interiors—from modern traditional and contemporary to coastal and transitional—these profiles offer the flexibility designers and builders rely on. And with their high-end appearance paired with cost-effective value, the Transitional Essentials Collection is ideal for large-scale projects and refined renovations.
